

## SPECIFICATIONS

ITEM	DETAILS
Motor Type	Powerful Brushed 540 Motor
Transmission	Forward and Reverse
Drive System	Belt Driven 4 Wheel Drive
Length	360mm
Width	200mm
Height	112mm
Wheelbase	260mm
Ground Clearance	4.5mm
Chassis Type	Plastic
Shocks	Aluminum Body Oil Filled Shocks
Speed Control	Brushed ESC
Battery	7.2V 2000mAh NiMh Battery+Charger
Radio System	2.4GHz Radio System

## THUNDER DRIFT 1/10 SCALE

Welcome to a whole new level of drifting with the 4WD belt driven, high performance Thunder Drift! Quality drifting requires precision driving to consistently challenge the line between control and chaos. A combination of brushed motor and special RC drift tires allow the Thunder Drift to slide effortlessly around corners, while the high performance belt drive system provides an edge over the typical drifter. Say goodbye to gear slop with the high performance belt drive system, which is adjustable for smooth precision operation. A forward and reverse ESC allow the Thunder Drift to back out of trouble so drifting domination can continue. A 2.4GHz radio system provides reliable control for precision maneuverability. Blue anodized aluminum threaded body oil filled shocks allow the driver to quickly adjust ride height and put more tension on a single wheel for precise tuning. Shock dampening can also be tuned by adding different weight oils inside the shocks, or by swapping out the pistons.

## UNIQUE FEATURES

### FRAME AND CHASSIS

- ▶ Aluminum Capped Oil Filled Shocks and Adjustable Independent Suspension.
- ▶ Belt Driven 4 - Wheel Drive.

### ELECTRONICS AND MOTOR

- ▶ Powerful Brushed Motor.
- ▶ Lightweight Chassis gives advanced performance.
- ▶ 2.4GHz Radio System

### DRIFT TIRES

- ▶ Proper tires to give you that fell and performance for drifting.
- ▶ Tires Mounted to Great Looking performance Rims.
